Introduction

These TechNotes support the FeedRight training programme. They combine research information and practical knowledge to help answer feed management questions on a seasonal basis.

FeedRight training will ensure farmers receive consistent, evidence-based nutrition advice enabling them to make profitable and sustainable feed management decisions on farm.

Key objectives for FeedRight participants are:

- increased understanding of dairy cow nutrition and feed management in a pasture-based system,
- increased knowledge and use of relevant, evidence-based resources and information,
- increased capability to help farmers make informed decisions regarding dairy cow nutrition and feed management in NZ.

Contents

Principles of nutrition

TechNote 1 – The digestive system and nutrient requirements

TechNote 2 – Energy, mineral and vitamin requirements

TechNote 3 – Feed components

TechNote 4 – Feed composition and characteristics

TechNote 5 – Carbohydrate metabolism

TechNote 6 – Protein metabolism

TechNote 7 – Lipid metabolism

TechNote 8 – Fibre metabolism

TechNote 9 – Pasture management

TechNote 10 – Response to supplements

Transition period

TechNote 11 – Understand the transition cow

TechNote 12 – Feed the transition cow appropriately

TechNote 13 – Monitor and mitigate milk fever

TechNote 14 – Monitor and mitigate ketosis

TechNote 15 – Monitor and mitigate fatty liver

Early lactation

TechNote 16 – Determine energy requirements

TechNote 17 – Allocate spring pastures correctly

TechNote 18 – Allocate required nutrients

TechNote 19 – Use supplements profitably

TechNote 20 – Achieve reproduction targets

Mid lactation

TechNote 21 – Understand energy requirements

TechNote 22 – Allocate summer pastures correctly

TechNote 23 – Allocate required nutrients

TechNote 24 – Use supplements profitably

Late lactation

TechNote 25 – Determine nutrient requirements

TechNote 26 – Allocate autumn pastures correctly

TechNote 27 – Measure and monitor body condition score

TechNote 28 – Use crops and supplements profitably

Dry period

TechNote 29 – Determine nutrient requirements

TechNote 30 – Achieve body condition score targets at calving

TechNote 31 – Manage winter pastures and crops correctly
